---

*Experience* **Weborama** since 2012

Project leader Weborama Audience Manager Backend

Weborama Audience Manager is a tools that handle real time validation on a huge amount of data, and redispach them to DSPs. The redispach is based on audience users create to target them on Exchange Platform.

The interface require the hability to lookup on a database of billions of users in a very short delay to have the best user experience possible.

We use Couchbase to store and get very quickly our data for the validation process, and Elasticsearch for the lookup into the WAM interface.

**Techno:** Perl, Couchbase, Elasticsearch, RabbitMQ, Redis, MySQL.

Project leader Adperf Publisher 2008-2012

I lead the Adperf Publisher Team (up to 6 members), a product dedicated to the publishers that handle their adserving. I have to deal with huge amount of traffic and I optimize all part of the product (the queries and the codes).

**Techno:** Perl, Ruby on Rails, Javascript, Redis, Riak, MySQL.

---

UTI-Group  
Perl junior developer

2005-2008

Maintenance and improvement of the OPTIMA product.  
Optimizing queries (IBM DB2) and Perl code.  
Project Leader of the extranet software.  
Creation of a reporting solution with Jasper.  
Installation and administration of the production servers.  
**Technology : Perl / Javascript / Java / Admin Linux / PHP**

---

Solintech  
Co-Fonder of the enterprise

2003-2005

We created solutions for the enterprises that manage their services (web, mails, databases...). For instance, we have built a secure embedded system with a web interface.  
**Technology : PHP / Javascript / Admin Linux**

---

*Formation*      Formation IBM      2007  
Advanced administration of IBM-DB2 databases(V8, V9)

---

*Education*      DEUG MIAS      2000 - 2003  
Bac S      2000

---

Projects SCK  
I have made a service to shorten urls wrote with Perl and MongoDB.  
<http://sck.pm>

---

Administer servers  
I have my own server fully install on FreeBSD and using jails + ipv6 for all my services.
